

SONIKA B P

AWS Data Analyst

+91 7204162388 sonikabpsonikabp@gmail.com [LinkedIn](#) Bangalore

SUMMARY

AWS Data Analyst with hands-on experience in building data pipelines using AWS services like Glue, Lambda, and S3. Skilled in Python and SQL for data processing, transformation, and validation. Experienced in data analysis using Excel and Power BI. Seeking a Data Analyst role to leverage data-driven insights and cloud-based solutions.

EXPERIENCE

Analyst

Bangalore, India

Deloitte

07/2025 - Present

- Worked on data processing and validation using Python and SQL.
- Built and maintained data pipelines using AWS Glue and Lambda.
- Managed data ingestion and storage using Amazon S3.
- Managed end-to-end data flow across S3 buckets (Landing -> Raw -> Curated).
- Performed data validation (null checks, duplicates, format validation).
- Automated workflows using AWS Lambda.
- Glue Crawlers for automation and schema detection.
- Implemented notification systems using AWS SNS.
- Worked on data analysis and preprocessing using Excel.

PROJECTS

01/2026 - Present

AWS Data Pipeline & Validation Project (Toyota - Thailand)

- Built end-to-end data pipeline using AWS services including Glue, Lambda, and S3.
- Managed data flow across S3 buckets (Landing -> Raw -> Curated) for analytics and dashboarding.
- Performed data validation checks (file format, data types, null values, duplicate records).
- Developed and executed AWS Glue jobs for data transformation and processing.
- Automated workflows and triggers using AWS Lambda functions.
- Utilized AWS Glue Crawlers for schema detection and metadata cataloging.
- Implemented AWS SNS notifications for alerting clients and developers on data failures.
- Supported data preparation for visualization and reporting purposes.

Data Processing & SQL Analysis Project (Haryana Government)

08/2025 - 12/2025

- Processed and cleaned raw data using Excel.
- Inserted and managed data in SQL (SSMS).
- Performed basic data analysis and validation.
- Refreshed Power BI dashboards for reporting.

TECHNICAL SKILLS

- Programming: Python
- Database: SQL
- Cloud: AWS (Glue, Lambda, S3, SNS, Crawler, Athena, Step function)
- Tools: VS Code, Excel, Power BI
- Concepts: Data Analysis, ETL, Data Validation, Data Pipeline
- Version Control: Git, GitHub

EDUCATION

Bachelor of Engineering in Computer Science and Technology

Mandya

G. Madegowda Institute of Technology

2021 - 2025

CERTIFICATES

Complete Data Analyst Bootcamp From Basics To Advanced

AWS Certified Data Analytics
